EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. P. Watkins, esq., on 01/04/2005.

The application has been amended as follows:

Cancel claim 11

In claim 9 replace the words "for cleaning" after the words "facing so as to be exposed" by the words ---to air flow---

In claim 9 after the words "eliminate said particles dislodged from said generally irregular surface features" insert ---with gravity assistance---

In claim 12 replace the words "for cleaning" after the words "irregular surface features exposed" by the words ---to air flow---

In claim 12 after the words "eliminating said particles dislodged from said generally irregular surface features" insert ---with gravity assistance---

Terminal Disclaimer

2. The terminal disclaimer filed on 01/04/2005 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date

of U.S. Patent 6,490,746 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to amendment

3. All previous rejections and objections have been overcome by Applicants' amendment, filed 10/15/2004 in combination with the Examiner's amendment and the said objections and rejections are withdrawn.

Allowable Claims

4. Claims 9,10,12 are allowable over the prior art of record.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance: the closest prior art of record are Young (U.S. 5,265,298) and Allen et al (4, 987,630).

While being similar to the instantly claimed invention, the teaching of Young does not anticipate or suggest fairly the cleaning method, wherein a substantially laminar gas flow is directed downwardly, wherein the curtain like stream of air is provided across the object with irregular features and wherein the dislodged particles are eliminated from irregular surfaces under conditions, which include positive assistance of gravity.

The teaching of Allen discloses a method for cleaning items with irregular surfaces by directing a curtain like air stream to the objects to be cleaned. However, the air stream in the teaching of Allen is directed upwardly and, therefore, the step of

eliminating dislodged particles from irregular surfaces under conditions, which include positive assistance of gravity is not anticipated or suggested fairly by Allen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Kornakov whose telephone number is (571) 272-1303. The examiner can normally be reached on 9:00am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on (571) 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
